Brief Description

The scalable architecture is involved in this kind of display rack, which applies to place exhibition articles, it is also can be used for hanging posters. When idle it can be used as a stool with its holders folded, and the stool' s legs can be folded when you do not use it, so we can obviously see that this product is convenient to carry and can be widely used. Besides, it can be said to be a multi-function display rack. This kind of display rack adopts glass fiber reinforced plastics. Its stability and endurance are strong. The product is made by plastics and glass yarn, which comes from the recycle and reprocessing of waste plastics and waste glass. Both are non-toxic harmless materials, and they can be mixed to strength the rack' s sturdiness.
